Experience

4Discovery

Forensic Examiner

2014 - Present (9 years)

Cybercontrols, LLC

Partner/ Sr. Director of Operations

January 2003 - Present (20 years 11 months)

As Sr. Director of Operations-Forensic Services at the Barrington, IL office of CyberControls, LLC., I am directly involved in all forensic operations and e-discovery cases at CyberControls including forensic acquisitions, examinations, productions and expert testimony.

My past decade of computer forensic experience has proven to be instrumental in leading to both convictions, exonerations and favorable settlements in hundreds of civil and criminal disputes. The variety of cases have spanned from fraud/embezzlement, misappropriation of trade secrets, reversal of wrongful criminal convictions, sexual harassment, computer code theft, deliberate spoliation of electronic evidence and a wide range of employee misconduct disputes.

As a court qualified expert with over eight years of management experience in network security, computer hardware integration, software development and analysis, I am a seasoned leader in the high tech security and forensics industry.

I have extensive expert testimony experience in state and federal courts and will provide my C.V. upon request.

Alterian

Technical Consultant

2001 - 2002 (1 year)

Acted as a technical interface between the sales representative and the prospect to facilitate software sales. Performed proofs of concept to demonstrate the capabilities of the software package. Developed new

interfaces, demonstration material, and reports using a variety of software languages. Worked with existing clients to solve technical issues and increase their sales volume.

Concepts Dynamic

Controller/Application Consultant/Technical Services Manager

December 1993 - December 2001 (8 years 1 month)

TECHNICAL SERVICES MANAGER – 1997 to 2001

APPLICATION CONSULTANT – 1995 to 1997

CONTROLLER – 1993 to 1995

Directed the Client Services Department responsible for providing on-going support and services to the current client base. Sold professional software services to existing customers. Project managed several complex custom software implementations over a large time scale. Performed second and third line support and troubleshooting duties to client base for both the software and database applications.
